The REU program at Hatfield Marine Science Center

The REU program at Hatfield Marine Science Center in Newport was established in 2004 and has since then expanded to include the College of Earth and Atmospheric Sciences at Oregon State University’s main campus. This 10 week summer internship which includes over 20 students across both campuses allows them to work closely with a faculty member while creating and executing their own research project and gaining academic background, training, and research experience to make informed decisions about careers and advanced degrees in marine earth system sciences.
